

Appointment Optimizer

Calculate Your Opportunity

Step 1

How many appointment slots does your practice have available every week?

Ex. 500

Step 2

What is the average dollar value of each appointment slot?

\$125

Step 3

Calculate the dollar value of a 100% full schedule.

500
x \$125
\$62,500

Step 4

Sum the weekly number of no shows, cancellations, and unfilled cancellations.

25 no-shows
10 late cancels
10 late reschedules
+5 underutilized days
+
50 patients

Step 5

Multiply the average number of no-shows by the average dollar value of an appointment slot.

50
x \$125
x \$

Step 6

Extrapolate for a year by multiplying weekly no-show rate multiplied by 52 weeks in a year.

\$ 6,250
x 52
\$

Ex. Total revenue lost: \$325,000 per year | Total revenue lost: \$ _____ per year
