You will report directly to the CEO and work alongside industry leaders to help define, develop and deliver world class SaaS solutions to . If you have a passion for working hands-on with cool tech and developing better functioning SaaS products to help revolutionize the healthcare industry, you'll love growing with us!

**\*\*This is a FULLY-REMOTE work from home position - and will stay that way\*\***

### What We Have For You:

- Be an individual contributor on software engineering and product development initiatives with a focus on delivering high quality solutions quickly
- Partner with product management and other stakeholders to drive planning of the product roadmap, release plans, and schedules.
- Contribute to the development and execution of platform strategies, inclusive of software, programmable infrastructure, security, and operational design.
- Continuously improve deployment frequencies and stability of engineering solutions.
- Build a culture of frictionless collaboration to fully understand the product and solution needs.
- Drive toward an architecture vision that includes cloud, mobile, big data, and API-enabled products.
- Ensure consistent application of standards and best practices across all technology projects, systems and services.

### Your Experience:

- Bachelors Degree or equivalent experience
- 10+ years experience in a hands-on software engineering role working with SaaS based products
- Current work experience using TypeScript in a Microsoft shop
- STRONG ability to effectively and clearly communicate software engineering concepts to technical and nontechnical audiences.
- Experience integrating with partner solutions and acquired technologies.
- Experienced at modernizing legacy systems
